FX803C

Dual band wireless local loop phone

WELCOME

Congratulations on the purchase of your Motorola <Model> product!

Please retain your original dated sales receipt for your records.

For warranty service of your Motorola <Model> product, you will need to provide a copy of your dated sales receipt to confirm warranty status.

Thank you for choosing a Motorola product.

Please read important safety instructions before use.

Read and understand all instructions before use.

Please retain this guide for future reference

1 GENERAL INFORMATION

1.1 Technical Information

Specific Absorption Rate Data

This model meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types FX803C (FCC ID: VH4FX803C) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.882 W/kg and when properly worn on the body is 0.605 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is

due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "hands-free" device to keep the mobile phone away from the head and body. Additional Information can be found on the websites of the World Health Organization (<http://www.who.int/emf>) or Motorola, Inc. (<http://www.motorola.com/rfhealth>).

* The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

1.2 Safety Information

Safety Information For Fixed Phones

Important information on safe and efficient operation.

Read this information before using your phone.

-
- **Exposure to Radio Frequency (RF) Energy.** Your phone contains a transmitter and a receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. When you communicate with your phone, the system handling your call controls the power level at which your phone transmits.

Your Motorola phone is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

- **Potentially Explosive Atmospheres.** Areas with potentially explosive atmospheres are often but not always posted and can include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain dust, or metal powders. When you are in such an area, turn off your wireless device, and do not remove, install, or change batteries. In such areas, sparks can occur and cause an explosion or fire.
- **Operational Precautions.** To assure optimal phone performance and make sure human exposure to RF energy is within the guidelines set forth in the relevant standards; always adhere to the following procedures.
 - **External Antenna Care.** Use only the supplied Motorola approved antenna. Unauthorized antennas, modifications, or attachments could damage the phone. Do NOT hold the antenna when the phone is IN USE. Holding the antenna affects call quality and may cause the phone to operate at a higher power level than needed. In addition, use of unauthorized antennas may result in non-compliance with the local regulatory requirements in your country.

-
- **Phone Operation.** When placing or receiving a phone call, hold your phone as you would a wireless telephone. To maintain compliance with RF energy exposure guidelines, ensure the phone antenna is at least 8 inches (20 centimeters) from your body when transmitting.
 - **Approved Accessories.** Use of accessories not approved by Motorola, including but not limited to batteries and antennas, may cause your phone to exceed RF energy exposure guidelines.
 - **RF Energy Interference / Compatibilities.** Nearly every electronic device is susceptible to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your phone may cause interference.

- **Medical Devices**

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 8 inches (20centimeters) be maintained between the fixed wireless phone and a pacemaker. Persons with pacemakers should:

- 1) Always keep the phone more than 8 inches (20 centimeters) from your pacemaker when the phone is turned ON.
- 2) Turn OFF the phone immediately if you have any reason to suspect that interference is taking place.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the

event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.

- **Batteries.** Batteries can cause property damage and / or bodily injury such as burns if a conductive material such as jewelry, keys, or beaded chains touches exposed terminals. The conductive material may complete an electrical circuit (short circuit) and become quite hot. Exercise care in handling any charged battery, particularly when placing it inside a pocket, purse or other container with metal objects. Use only original batteries and chargers.

Your battery or phone may contain symbols, defined as follows.

	Important safety information will follow
	Your battery or phone should not be disposed of in a fire
	Your battery or phone may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.

	Your battery or phone should not be thrown in the trash
---	---

- Please don't use any damaged battery or charger and use the battery only for its intended purpose.
- Don't apply extreme shock to the battery. It's dangerous to disassemble a battery or to apply extreme shock to the battery via nail or heavy metal objects.
- Keep the charger or batteries out of reach of small children or babies. Please instruct children the proper ways of handling phone during usage.
- Shock circuit and breakdown may occur and cause severe danger to user due to improper usage.
- Always try to keep the battery between -10° ~ 55° Celsius.
- Use only manufacturer approved rechargeable batteries and charger designated for this device.

AC/DC Adapter

AC/DC Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

This power unit is intended to be correctly orientated in a vertical or horizontal or floor mount position,

Important Safety Instructions – Save these instructions

Danger – To reduce the risk of fire or electric shock, carefully follow these instructions

For connection to a supply not in the U.S.A., use an attachment plug adapter

of the proper configuration for the power outlet.

- **Seizures / Blackouts.** Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when watching television or playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your doctor.

1.3 Warranty

Limited Warranty for Personal Communication Products, Accessories and Software.

What Does this Warranty Cover? Subject to the exclusions contained below,

BRIGHTSTAR warrants the Motorola branded FX-803C that it manufactures ("Products"), to be free from defects in materials and workmanship under normal consumer usage for the period(s) outlined below. This limited warranty is a consumer's exclusive remedy, and applies as follows to new Motorola branded Products manufactured by BRIGHTSTAR, and purchased by consumers around the world, which are accompanied by this written warranty:

Products Covered

Products as defined above.

- 1) The Fixed Wireless Telephone.
- 2) The accessories included with the Fixed Wireless Telephone.

Length of Coverage

One (1) year from the date of purchase by the original consumer/purchaser of the product.

Exclusions

- 1) **Batteries.** Only batteries whose fully charged capacity falls below 80% of their rated capacity and batteries that leak are covered by this limited warranty.
- 2) **Abuse & Misuse.** Defects or damage that results from: (a) improper operation, storage, misuse or abuse, accident or neglect, such as physical damage (cracks, scratches, etc.) to the surface of the product resulting from misuse; (b) contact with liquid, water, rain, extreme humidity or heavy perspiration, sand, dirt or the like, extreme heat, or food; (c) use of the Product for commercial purposes or subjecting the Product to abnormal usage or conditions; or (d) other acts which are not the fault of BRIGHTSTAR, are excluded from coverage.
- 3) **Use of Non-Motorola branded Products and Accessories.** Defects or damage that results from the use of non-Motorola branded or certified Products, Accessories, Software or other peripheral equipment are excluded from coverage.
- 4) **Unauthorized Service or Modification.** Defects or damages resulting from service, testing, adjustment, installation, maintenance, alteration, or modification in any way by someone other than BRIGHTSTAR or its

authorized service centers are excluded from coverage.

- 5) **Altered Products.** Products or Accessories with (a) serial numbers or date tags that have been removed altered or obliterated; (b) broken seals or those that show evidence of tampering; (c) mismatched board serial numbers; or (d) nonconforming or non-Motorola branded housings, or parts, are excluded from coverage.
- 6) **Communication Services.** Defects, damages, or the failure of products, due to any communication service or signal you may subscribe to or use with the Products is excluded from coverage.

Who is covered?

This warranty extends only to the first consumer/purchaser, and is not transferable.

What will BRIGHTSTAR Do?

BRIGHTSTAR, at its option, will at no charge repair, replace or refund the purchase price of any Product that does not conform to this warranty. We may use functionally equivalent reconditioned / refurbished / pre-owned or new Products, Accessories or parts. No data, software or applications added to your Product, Accessory or Software, including but not limited to personal contacts, games and ringer tones, will be reinstalled. To avoid losing such data, software and applications please create a back up prior to requesting service.

How to Obtain Warranty Service or Other Information

For information on how to obtain service, contact the place where the product was purchased or a BRIGHTSTAR Service Center in your country.

In order for this Warranty to take effect, take your unit, along with this policy, to the place of purchase or to a BRIGHTSTAR Authorized Service Center.

You will receive instructions on how to ship the Products, at your expense, to a BRIGHTSTAR Authorized Repair Center. To obtain service, you must include: (a) a copy of your receipt, bill of sale or other comparable proof of purchase; (b) a written description of the problem; (c) the name of your service provider, if applicable; (d) the name and location of the installation facility (if applicable) and, most importantly; (e) your address and telephone number.

What Other Limitations Are There?

ANY IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY, OTHERWISE THE REPAIR, REPLACEMENT, OR REFUND AS PROVIDED UNDER THIS EXPRESS LIMITED WARRANTY IS THE EXCLUSIVE REMEDY OF THE CONSUMER, AND IS PROVIDED IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. IN NO EVENT SHALL BRIGHTSTAR BE LIABLE, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE) FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, OR FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR

CONSEQUENTIAL DAMAGES OF ANY KIND, OR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE ABILITY OR INABILITY TO USE THE PRODUCTS, TO THE FULL EXTENT THESE DAMAGES MAY BE DISCLAIMED BY LAW.

Some states and jurisdictions do not allow the limitation or exclusion of incidental or consequential damages, or limitation on the length of an implied warranty, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state or from one jurisdiction to another.

1.4 Regulatory

Brightstar Corp. hereby declares this unit to be in compliance with the relevant Provisions of the Low Voltage Directive 73/23/EEC and the EMC Directive 89 / 336 / EEC.

Brightstar Corp. hereby declares this unit to be in compliance with the essential requirements and other relevant provisions of Directive 1999/519/EC.

1.5 FCC Notice To Users

We have not approved any changes or modifications to this device by the user.

Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.19(3).

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions

- 1) This device may not cause harmful interference, and
- 2) This device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

If your mobile device or accessory has a USB connector, or is otherwise considered a computer peripheral device whereby it can be connected to a computer for purposes of transferring data, then it is considered a Class B device and the following statement applies:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help

Clear key	<ul style="list-style-type: none"> ■ Enter right bottom submenu such as Names on the display. ■ Press Clear key to erase character(s) while editing or dialing. ■ Press Clear key to cancel operation and exit to previous pop-up window interface.

Key	Description
Up/Down/Left/ Right key (Scrolling key)	<ul style="list-style-type: none"> ■ Scrolling key used as selection key Up/Down/Left/Right for selecting the commands and items shown on screen display. ■ In standby mode, press Up/Down key to enter Messages /Ring, press Left/Right key to enter ToolKit/ Games. ■ Move the cursor when inputting letters. Scroll the cursor in menu option and display.
Call key	<ul style="list-style-type: none"> ■ Make a call or answer an incoming call. ■ In standby mode, press Call key to enter All Recent Calls list.
End key	<ul style="list-style-type: none"> ■ End an active call or reject calls. ■ Power on/power off. ■ Exit from any window interface to standby mode.
Speaker/Ok key	<ul style="list-style-type: none"> ■ Hand-free mode(Speaker mode). ■ Select or confirm options in Menu and left bottom submenu on the display.
0~9 Number key	<ul style="list-style-type: none"> ■ Use the number keys to enter numbers and characters.
# key, * key	<ul style="list-style-type: none"> ■ Differs in different mode, option or function menu.

Note: “Press the key” in manual means pressing certain key once, “Hold the key” means pressing key for 2 or 3 seconds.

2.4 LCD Screen Description

These icons may appear on screen display of your phone.

Icon	Indication
	Signal strength
	Roaming
	New voice message
	New message
	Silence All
	Alarm
	Power indicator

2.5 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, use up the power and charge it fully for a new battery to perform well.

Power off phone and remove battery if the phone is not in use for a long time.

2.5.1 Remove and Installation of Battery

Remove: (1) Press and push the back-cover of the phone down to release and remove it off the phone. (2) Remove the battery from the battery slot, disconnect the plug.

Installation: (1) Insert the battery into the battery connector, then put the battery down to the battery slot-the side without labels is downward.

(2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.

2.5.2 Charge the Battery

◆ Connect the lead of the charger to the power jack at the back of phone.

- ◆ Connect the charger to a standard AC socket.
- ◆ Meanwhile, the charge LED in front of the phone lights on. And the charging indicator in up-right corner of the display flops cyclically, indicating the charging is going. In power-off mode while charging, the display only shows the charge indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.
- ◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 4 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.
- ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

Note:

- When it is in charge, place the phone on condition of good ventilation and temperature between $-10^{\circ}\text{C} \sim +55^{\circ}\text{C}$. Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.
- When the phone is automatically switched off or indicates the alarm information of power shortage, charge the battery in time.
- The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working environment and application methods.

2.6 Connect to the Network

2.6.1 Power on/off Phone

Press and hold **End key** to power on/off the phone and then follow the indication on the display:

Enter Phone Lock——Key in Phone Lock code of the phone if it is set as on. To set Phone Lock code, see “7.4 Security Settings”.

Searching——Search appropriate network connected.

2.6.2 Connect the Network

After powering on and inputting Phone Lock code, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

- ◆ Press **Menu/Select key** to enter main Menu.
- ◆ Press **Clear key** to enter **Names** menu.
- ◆ Hold **Up key** to enable the **Silence** function.
- ◆ Press **Up key** to enter **Messages** menu.
- ◆ Press **Down key** to enter **Ring** menu.
- ◆ Press **Left key** to enter **ToolKit** menu.
- ◆ Press **Right key** to enter **Games** menu.

- ◆ Press **Call key** to enter **All Calls** list.

3 BASIC OPERATIONS

3.1 Make a Call

Ensure that you are in the place where the signal can be received. Examine network signal strength icon  on the screen.

The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

- ◆ **Make a Domestic Call**

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Call key** to call out. Press **End key** to end the call and conversation.

- ◆ **Make an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Call key** to call out.

Before the country code, hold **0 key** to enter the international prefix “+” (the character “+” replaces the international access code) or key in international

prefix e.g. “00” of international call directly.

Country code + Area code + Telephone number
0086 755 26770000

- ◆ **Make Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Incoming Calls and Outgoing Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

- ✧ In standby mode, press **Call key** to view All Calls.
- ✧ The number listed in can be directly dialed by pressing **Call key**.

- ◆ **Make Pause Calls**

You can make use of pause call to dial an extension or voice service call.

E.g. Key in first phone number, press **Speaker/Ok key** to select “P” on the display (character “P” added accordingly), and then key in second number afterwards. Press **Call key** to dial the first number, when connected, press **Call key** or **Menu/Select key** to dial the second number. “P” can be used for not once only.

- ◆ **Make a Three-way Call**

The phone supports Three-way Call. When two parties are talking, each party can dial the third party with holding the current call by pressing **Call key**. When the third party is turned on, press **Call key** again to reactive the call on hold and enter the Three-way Call state. If the originating party ends the call, all the calls end; otherwise, two-party talking continues.

Note: This function needs local network's support. Consult with network service provider to get corresponding service application.

◆ **Make a conference call**

The phone supports conference Call. So you can have a conference with some different parties (the maximum number of conferees rests with the local network) by this phone. You need call the conferees one by one, and then press **Call key** to enter the conference state.

Note: This function needs local network's support. Consult with network service provider to get corresponding service application and detail operation guide.

3.2 Answer a Call

When a call is incoming in standby mode, the phone will offer corresponding ringer to prompt. With the number already saved in Names, the phone also shows the name of caller meanwhile.

- Press **Call key** to answer an incoming call.
- Press **End key** to end a call and the call duration is temporarily displayed.

Note: Pulling away and inserting power supply adapter is forbidden during conversation.

3.2.1 Answer Automatically

You can set the phone to answer an incoming call automatically.

- Select **Menu**→ **Settings**→ **Call Setting**→**Auto Answer**.
- Select **On**, and press **Speaker/Ok key** to confirm.

The phone can be connected in 10 seconds.

3.2.2 Set Any Key Answer

- Select **Menu**→ **Settings**→ **Call Setting**→ **One—Touch**.
- Select **On**, and press **Speaker/Ok key**.

An incoming call can be answered by pressing any key except **End key** or **Clear key**.

3.2.3 Incoming Call Silence

When a call is coming, press **Clear key** to select **Mute** to mute the ringer tone.

This function silences the current incoming call only. The phone will ring normally as next call coming.

3.3 During a Call

During a call, press **Speaker/Ok key** to enable/disable the hand-free function; press **Menu/Select key** or **Clear key** to select options of **Option (Names, Messages or record)**, **Mute/Unmute**,etc.

- ◆ Select **Mute/Unmute** to let the other party temporarily can or can not hear your voice;
- ◆ Select **Option** for selection in Menu, such as **Names, Messages or record**, with no worry about the ending of conversation.

You can also press **Left/Right key** to adjust volume of Earpiece during a call.

3.4 Leash Function

Leash is a distance limitation talking function, developed to Cordless fixed wireless phones. If the Cordless fixed wireless phone, during a conversation, passes any of the limits, the end user will hear a beep and if he stays out of the limit, the call will

be dropped. Both of solution the end user do not need to invoke the feature, it depends on the carrier strategy.

When you beyond the scope of service, this phone will be issued every two seconds in a prompt tips and a prompt "PLEASE BACK SERVICE!" will appear on the LCD screen, after five consecutive times you will not be able to use the telephone and a prompt "OUT OF SERVICE!" will appear on the LCD screen.

If you couldn't find your phone because of your inadvertence, you can press the button "PAGE" on the desk charge, the phone will be issued a string of so-ling sound then you can find it easily .

3.5 Menu Functions

◆ Main Menu Function:

- ✧ In standby mode, press **Menu/Select key** to enter main **Menu**. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.
- ✧ If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.
- ✧ Press **Menu/Select key** or **Speaker/Ok key** to confirm. Press **Clear key** to return to the previous menu level. Press **End key** to exit to standby mode.

The functions of phone are mainly grouped in main **Menu: Names, Messages, Call History, Settings** and **ToolKit**.

Refer to the text hereinafter in this manual in detail.

4 NAMES

You can save contacts in phone. Each contact in phone's memory has three phone numbers: home number, mobile number and work number. There are three groups, **Family**, **Friend** and **Colleague** in phone. Select **Option** → **Other options** → **Capacity** to view memory of phone.

4.1 View Records

All the contacts in **Names** are grouped in **No Group**, **Family**, **Friend** and **Colleague**.

1. Press **Menu** → **Names**.
2. Press **Left/Right key** to view all contacts and all Groups list one by one. If there is no contact in the list, “No item” will be displayed.

Press **Up/Down key** to scroll to the name you are finding, and press **Menu/Select key or Speaker/Ok key**, you can see the details of the name.

4.2 Find Records

You can search for a name in **Names** by choosing:

◆ In All List
